GBG
IDology

About GBG IDology

We build, collaborate and partner to create a world where everyone can transact online with confidence

IDology is a leading identity verification provider

Over 20 years experience building and delivering comprehensive identity verification, compliance and fraud management solutions.

Our solutions cover the complete customer lifecycle

From onboarding to step-up authentication, reverification and always on risk monitoring, we help to drive revenue, deter fraud and maintain compliance.

We balance customer experience and fraud prevention

Verify the identity of almost anyone, anywhere in the world with minimal friction for a superior customer experience.

Why GBG IDology?

Trust a proven global provider

Innovative. Proven. Trusted.

20+ years of experience serving industry leaders with technology, data and intelligent orchestration.

End-to-end solutions

Ready-made or custom workflows from front-end to back, integrate point solutions or the entire platform.

One stop service provider

Everything in one place to be compliant and fight fraud with one vendor, one contract, one API.

Extensive global coverage

Verify almost anyone with billions of data records, one of the industry's largest ID libraries and biometrics.

Omnichannel deployment

Cloud, on-premise, API and no code integration options to balance agility, privacy, resources and cost.

Personalized support

Committed to building long-standing customer relationships through responsive service and support.

Document Authentication

Authenticate government-issued IDs online or in person with 50+ forensic tests in seconds

Identify more customers with more confidence

Establish trust in seconds

Offer an easy, rapid document authentication process for a convenient customer experience that drives conversions.

Acquire more customers and promote financial inclusion

Accept the widest range of IDs including driver's licenses, passports, eIDs and more.

Operate in virtually any channel

Engage with customers in their preferred channel — mobile, online, desktop scanners, kiosks and cross-device workflows.

Auto-capture
identity
documents

Data extraction
and auto-fill

7,500 document
types spanning
196 countries

Process ePassports and eIDs
using an NFC-capable device

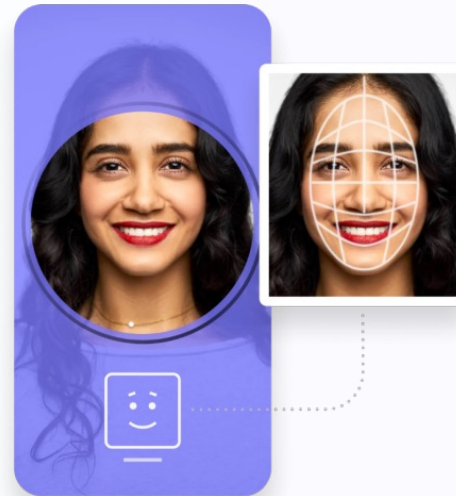

Automatically classify
document types

Document Authentication + Selfie IDV

Combine forensic and biometric data to verify with confidence

Capture and auto-classify
identity documents

Add biometric and passive
liveness checks

Get definitive verification
results in seconds

Data Fill

Capture identity documents online or in person, extract data and populate other systems or apps

Ease the transition to fully digital processes

Speed up transactions

Extract data and images instantly and populate your application with accurate information in seconds.

Cut labor costs

Scale back costly, labor-intensive data entry tasks and replace them with efficient digital workflows.

Improve decision making

Access high-quality digital data for automated and accurate decisions eliminating manual, error-prone processes.

Automatic identity document capture

Accurate data extraction

Seamless data integration

MedicScan[®]

Capture IDs and insurance cards, extract data and feed accurate information to EMR/EHR systems

Bring efficiency and accuracy to the patient experience

Superior patient satisfaction

Replace a tedious, paper-based registration process with an automated workflow that removes unnecessary friction and improves your HCAHPS scores.

Cut processing costs

Eliminate costly, labor-intensive processes that require photocopies and manual data entry in favor of automation.

Minimize fraudulent activity

Accurately verify insurance coverage and patient identities to prevent insurance fraud and other healthcare fraud schemes.

Auto-capture insurance cards and IDs

Accurate data extraction

Seamless data integration
